

# Word Search

Below you will find fifteen Spanish number words hidden. The number words are between "one" and "twenty nine". Some words will be found diagonally. No words are in the puzzle backwards.

Find the words and mark your answers in two ways. You can decide what the marking system is, but mark even numbers in one way and mark odd numbers in another way. An easy way to do this is to use two different colors. Or you could circle some and cross out others. Tell me your system here:
